

THE WORLD OVER

TO EXTRACT GOLD AND SILVER FROM ROOM'S FLOOR AND WALL

OTTAWA—Treatment of old floor and wall material from the dismantled refinery section of the Royal Canadian Mint here by the Dominion Fuel laboratories is expected to return hundreds, perhaps thousands of dollars. It was learned Wednesday that gold and silver particles lodged in the wall and floor material through past years will be recovered.

LIBERALS RETURNED, N. SCOTIA

HALIFAX—The Liberal administration of Premier Angus I. Macdonald, who was elected last week in the Nova Scotia elections on Tuesday, will dine three more weeks to the 22 held in the last House. There are 30 seats in the Legislature.

WORK ON THE CARBON SWIMMING POOL NOW WELL UNDER WAY

The committees appointed on the project of the Carbon Community Swimming Pool have been in action during the past week and Mayor Garrett had a gang of men on the job last week and soon had the excavation completed. Forms for the cement are now being constructed and from all indications it will not be long before the cement work is started. Volunteer labor is being used extensively and there is always work to be done at the pool site just now. With this in mind the committee in charge asks anyone who can to turn out and help in the construction of this community enterprise. Remember, "there is work for idle hands to do."

Cash donations to the Swimming Pool are now being received by the Finance Committee and no fear of the subscription list has been well supported. If you feel that you want a swimming pool in Carbon and you can donate a few dollars to the pool, your contribution will be greatly appreciated.

NORMAN NASH WINS SINGLES CHAMPIONSHIP IN DISTRICT TOURNEY

Miss Annie Lemay Wins Ladies' Championship by Defeating Drumheller Champion

The Lawn Tennis Championships of District No. 5 were commenced at Carbon on June 27th and Norman E. Nash of Carbon won the Men's Championship Singles for the second year in succession, defeating Allan Birch, also of Carbon, in the final. Nash had a close call in the semi-final when Francis Poorn, Carbon, (the boy champion of Alberta) had match point in the second set after winning the first set.

Miss Annie Lemay (the 15-year-old girl player of Carbon) won the Ladies' Championship Singles by defeating Jack Birch of Gleichen in the final. The Men's Doubles, Ladies' Doubles, Mixed Doubles Championships will be played off at Carbon on July 4. The following teams had representatives in the Singles tournament: Acme, Bassano, Carbon, Drumheller, Gleichen, Trochu and Rosbeed. These and several other teams, will have representatives in the Doubles.

The following are the results and scores in the Singles:

Men's Championship Singles

N. Nash, Carbon, by default from C. Ritz, Trochu. C.H. Smith, Carbon, defeated B. Rinn, Acme, 6-1, 6-1. C. Birch, Gleichen, defeated C. Poorn, Carbon, 3-6, 6-1, 6-0. The other competitors received byes.

2nd Round—C. McLeay, Bassano, defeated W.A. Bralder Jr., Carbon, 6-3, 6-1, 6-0. F. Poorn, Carbon, defeated W. McLeay, Bassano, 6-2, 6-3, 6-0. R. Donaldson, Bassano, defeated V.P. Hawkins, Carbon, 3-6, 6-5, 7-5. N. Nash, Carbon, defeated C.H. Smith, Carbon, 6-5, 6-3, E.M. Borral, Trochu, defeated C. Birch, Gleichen, 6-3, 6-5, 7-5. H. Edwards, Carbon, defeated R. Sunstetter, Rosbeed, 6-2, 6-5, 6-3. P. Poorn, Drumheller, defeated C. Smith, Acme, 6-1, 6-0, A. Birch, Carbon, defeated S. Jamieson, Drumheller, 6-0, 6-4.

Quarter-Finals—F. Poorn defeated

C. McLeay, 6-2, 6-1, N.E. Nash defeated R. Donaldson, 6-0, 6-1, H. Edwards defeated E.M. Borral, 6-2, 6-1, A. Birch defeated P. Poorn, 6-2, 6-5, 6-3.

Semi-Finals—N.E. Nash defeated F. Poorn, 6-2, 6-5, 6-3. A. Birch defeated

H. Edwards, 6-1, 6-2.

Final—N.E. Nash, Carbon, defeated

A. Birch, Carbon, 6-3, 6-5.

Women's Championship Singles

Miss C. Smith, Carbon, defeated Miss S. Tarrance, Carbon, 6-2, 6-0.

SPORTS

Rosbeed Defeats Hesketh

Rosbeed softball team defeated the Hesketh team at Rosbeed on Sunday, June 28th, by a score of 9-7.

Grainger Defeats Carbon

Carbon girls softball team lost its first game of the season on Saturday night when the Grainger girls won in succession, defeating Allan Birch, also of Carbon, in the final. Nash had a close call in the semi-final when Francis Poorn, Carbon, (the boy champion of Alberta) had match point in the second set after winning the first set.

Grand Frolic Wins Double-Header

In a league contest on Sunday between the Carbon and Grand Frolic softball teams, at Carbon, the visitors were successful in winning the two games played, the first by a 24-15 score, and the second by a 25-16 score. In the first game batteries were Grand Frolic—Gibson, W. White, Carbon—Trumbley, Skerry and Cameron. In the second game batteries were Grand Frolic—Gibson and Geo. White, Carbon, Geo. Ives and H. Trumbley.

Carbon Wins From Three Hills

There was plenty of excitement in the baseball game on Sunday between the Carbon and Three Hills teams. Carbon, 6-5, won games 1-5, with the Three Hills boys putting in the 8th inning. Batteries were: Three Hills, Hess and Empey; Carbon, Trepanier and Mathers.

The other competitors received byes.

Quarter-Finals—Miss A. Lemay, Carbon, defeated Miss L. Fowler, Acme, 6-2, 6-5. Mrs. C. Smith, Carbon, defeated Miss R. Reed, Carbon, 5-3, 6-3. Miss M. Ramsey, Carbon, defeated Mrs. Borsal, Trochu, 6-2, 6-1.

Semi-Finals—Miss A. Lemay, Carbon, defeated Mrs. C. Smith, 6-1, 6-0. Miss L. Fowler, Carbon, defeated Mrs. M. Ramsey, 6-1, 6-0.

Final—Miss A. Lemay, Carbon, defeated

Miss L. Fowler, Carbon, 6-1, 6-0.

Men's Secondary Singles

R. Sunstetter, Rosbeed, defeated W. McLeay, 6-2, 6-3. S. Jamieson, Drumheller, defeated B. Rinn, 6-2, 6-0. C. Birch, defeated W.A. Bralder Jr., 6-2, 6-3. The other competitors received byes.

Quarter-Finals—C. Poorn defeated

R. Donaldson, 6-1, 6-0. S. Jamieson, Drumheller, defeated B. Rinn, 6-2, 6-0. C. Birch, defeated W.A. Bralder Jr., 6-2, 6-3. The other competitors received byes.

Semi-Finals—S. Jamieson defeated

C. Poorn, 6-3, 6-1. C. Birch, defeated C.H. Smith, 6-2, 6-0.

Final—S. Jamieson, Drumheller, defeated

C. Birch, Gleichen, 6-1, 6-3.

Women's Secondary Singles

Miss P. Poorn, Carbon, defeated Miss S. Tarrance, Carbon, 6-2, 6-0. Miss C. Smith, Carbon, defeated Miss S. Tarrance, Carbon, 6-2, 6-0.

Semi-Finals—Miss P. Fowler defeated

Miss P. Poorn, Carbon, 6-0, 6-1. Miss J. Skerry defeated R. Reed, 6-0, 6-5.

Final—Miss P. Fowler, Acme, defeated

Miss J. Skerry, Carbon, 6-3, 6-4.

MAN MUST STEP LIVELY TO CHECK INSECT MENACE

Certain insects are commensal as usual of industry, the busy bee, for instance, and those of us who are sluggards are told to go to the ant, putting it mildly. But other insects, no less industrious, cannot be ignored, however much we may wish to shun them. They are not black flies or mosquitoes, or the kind one can swat either, but those whose ravages extend to plague proportions and wreck untold havoc in garden, orchard, field and forest. As H. Leslie Emalle, C.D.A., writes, we have to contend with insects that suck, bite and sting, fly, crawl, skip and hop and must step lively to keep a jump ahead of them. On the principle that "big bugs have little fangs on their back to bite," little fangs have longer fangs and as insects, "jump," parasite insects have been imported for the purpose of preying on the predatory insects or their larvae.

Earns High Post

It is G. McNeill, widely known and popular Canadian Pacific Railway official, who on June 30 received C. B. Foster as passenger traffic manager of the company with headquarters in Montreal. Mr. Foster returns under the pension regulations after 46 years of service. Announcement of Mr. Foster's retirement was made by George Stebbins, Traffic Vice-president of the company.

WEEKLY COMMENT ON THE WORLD OF WHEAT BY H. G. L. STRANGE

"The custodians of quality in Canadian crops."

This would be an accurate short description of those many important people and bodies who together form the Canadian Seed Growers' Association.

The ability to market Canadian wheat for instance, on World's markets, and the price premium which is usually commanded, are the results almost alone of that characteristic "tenacity" or "quality."

Wheat quality, in turn, is a matter of a highly bred particular variety.

A highly bred particular variety is the product of skilled, professional plant breeders. But the previous small handfuls of seed which, after years of labor and toil, the plant breeder produce, would obviously be valueless if distributed to tens of thousands of farmers.

The members of the Canadian Seed Growers' Association, with patient care and application, and under the supervision of the Association's official, multiply these precious handfuls of seed into thousands of bushels which, as the original handful, and then make it all available to farmers at moderate prices.

The service thus rendered by the Members of the Canadian Seed Growers' Association, is not only important.

'HER INCUBATOR HUSBAND'

These means are being employed in the fight against the Russian corn borer and the spruce sawfly which cannot be tackled successfully with poison sprays.

Birds and Bugs

The wholesale slaughter of certain species of birds is deploable, when the breeding season, consume 24,000 insects and larvae, besides an enormous number of insect eggs. It has been estimated that a birdling in the first month of its life, will eat twelve times its own weight of insects. This becomes more significant when we learn that a young caterpillar, in the same space of time, will devour 400 times its own weight of food. Thus, the birds, insect eaters, quickly gain the upper hand, despite all man's efforts to control them with nicotine sulphate and lead arsenate.

'HER INCUBATOR HUSBAND'

Following factors have tended to lower prices:

Boundless to fair rains in Manitoba, southern Alberta and parts of Saskatchewan. Wheat yields in Texas 20 to 40 bushels per acre. Light to heavy rains in U.S. spring wheat territories. Cuts in European foreign crop in prospect.

TOM BARBER SUFFERS IN FALL FROM WAGON

Tom Barber, farmer east of town, met with a painful accident on Saturday while crossing the railroad track in a wagon. The horses became frightened and Barber was thrown from the wagon. Dr. McFarlane was called and the injured man was taken in an ambulance to Drumheller hospital and an X-ray revealed that no bones were broken. However, in the fall Mr. Barber had both arms paralyzed and latest reports are that he has not regained their use.

CROPS IN DISTRICT MAKING RAPID GROWTH BUT MOISTURE NEEDED

Following last week's rain and with warm weather this week, the crops in the district are making rapid growth and many farmers report their wheat heading out, or headed out. Intermittent showers at this time of the year will greatly benefit the growing crops and if the weather continues clear, there should be many good crops throughout the district.

Wheat Four-Foot High

Sid Wright has a sample of French barley in the Service Station that was taken from the McCracken farm north of town and it is completely headed out. From tip to tip the stand measures four feet and the heads are long and well formed.

The following general crop report

has been issued by the Bank of Montreal.

In the Prairie Provinces but south,

as has raised rapid growth of grain crops in regions where moisture reserves are adequate, but there are large areas in which rain is urgently needed. The lack of adequate rainfall to date has resulted in deterioration of crops in central and west central Saskatchewan and over a large part of Alberta. Crops in Southern Saskatchewan are poor and some insect damage is reported. In other parts of Canada both east and west heavy rains have been recent and growth has been rapid, although crops are still somewhat backward.

In Alberta crops generally are deteriorating

for lack of moisture. The wheat is heading out next and moisture are now in all sections except north west 1858.

ant, but he will be said to be a vital necessity to Canadian agriculture.

Following factors have tended to raise prices:

Lack of rain in northern Saskatchewan and Argentine. Reduction in the U.S. government wheat allotment. Heat wave in Europe. Anticipation of Canadian "carry-over" for past twelve years. U.S. Department of Agriculture forecasts poor European wheat and rye harvest. Expect Chinese wheat crop 15 to 25 per cent lower 1938.

CARBON STAMPEDE ASS'N PUTS ON EXCELLENT DAY OF SPORT FOR SPECTATORS

Drumheller Boys Pine Road Led Parade in Morning

Good riders and excellent leading horse, combined in making what a 5-4 mile stampee on Tuesday a real success and spectators were treated to a real afternoon's sport.

The Drumheller Boys' Pine Road Led Parade in Morning

The crowd at the stampee grounds was not as large as in former years, but the events were run off much better and some first class riders and horses were shown by many parts of southern Alberta. Winners in the stampee events were as follows:

Break Riding With Saddle—Jack

Sherman, 1st; Darling Sand, 2nd.

Barrel Race—Frank Postgate, 1st;

Jack Hill, 2nd; Roy Thompson, 3rd.

Steeple Chase—A. Calverton, 1st; R.

Thompson, 2nd; Eddie McCoy, 3rd.

Weld Cup Milking—Pat L. From-

doie, 1st; Ken Thompson, 2nd.

Calif. Riding—Eddie McCoy, 1st; R.

Thompson, 2nd.

Barrel Race—V. Galbreath, 1st; G.

L. Rau, 2nd; R. Swain, 3rd.

Shedding Pony Race—G. L. Rau, 1st;

Victor Kuhn, 2nd; Paul Haines, 3rd.

Free-For-All—Pat L. Fromdoie, 1st;

F. Elliott, 2nd; Eddie McCoy, 3rd.

Billy Race—Pat L. Fromdoie, 1st;

Clarence Gwynn and Pat Baver, 2nd; G. L. Rau, 3rd.

In the evening at the baseball game

Carbon was won from Strathell with a 5-0 score. Batteries were: Strathell, J. Emery and L. Hunter, Carbon, Jack Matthews and Les Thompson. Postures of this game were two home runs, one scored by Harry Woods, and the other by John Rogers. For the pitchers, Matthews had 21 strikes-out, and Emery 13.

To wind up the day a big dance

was held in the Farmers' Exchange hall, with Mrs. Treinor, co-sponsor of Calgary supplying the music. The supper at the dance was supplied by the Carbon community.

In the draw for the Hudson Bay

Blankets, Art Hudson, with ticket No. 10, was the lucky winner.

LOST—Parker fountain pen in Carbon

on stampee day. Finder return to Harvey Barker.

Frank Barker is around again after

his recent illness, but will not be on the job for another month. He expects to leave this week end for a holiday at Banff.

Boost for the Swimming Pool.

'HER INCUBATOR HUSBAND'

In the south where pastures are good and crops continue promising, follows, but fairly general heavy rains. The outlook is bright for irrigated crops and best thinking is completed.

Saskatchewan—Crop conditions in

the east central and northern districts where rain has fallen continue good. In other sections crops have deteriorated. Cuts in European foreign crop in prospect.

except in a limited area in the south

where recent rains have been beneficial. Generous rains are required immediately. Pastures are dry.

SEE THE NEW BEACH ELECTRIC REFRIGERATOR

A Great Menace

The automobile speed artist is a great menace on the highways but he is not the greatest source of danger to the lives and limbs of other users of the open roads.

The man who drives at night with one light ablaze and the other extinguished perhaps epitomizes the maximum peril on the highway, not only to himself and other occupants of the car he is piloting but to other drivers and the occupants of other automobiles. Certainly as a potential destroyer he ranks only second to the driver with liquor-laden breath.

The one-light driver is dangerous to the drivers and occupants of other cars whom he meets in the same direction, because the "safety" driver is unable to tell whether the single light is on the high or the off side of the approaching car. If it happens to be the off side light that is burning the driver meeting him may be fooled and make insufficient allowance for clearance. The result is a terrific crash, serious injuries and perhaps death.

The natural instinct of the "safety" driver meeting a one-light car is to give the latter as wide a berth as possible, because of the uncertainty as to which side of the approaching car is lighted. But here, too, there is a risk that he may plunge into the ditch in his efforts to ensure adequate clearance.

Under any conditions the one-light driver is a danger to others as well as to himself, but particularly is this the case when cars travelling in the same direction are passing one another with a single-lamp car approaching in the opposite direction.

Distances at night time are deceptive, even to the most experienced drivers. When both lights are burning it is not too easy to gauge the distance and speed of an approaching car. To many drivers the oncoming car from the opposite direction may appear a considerable distance away whereas it is actually close at hand and vice versa.

The only guide that one has as to distance and the speed of an automobile approaching at night time is the apparent distance between the two lamps and the rapidity with which this distance diverges as the car approaches.

At a considerable distance away the two lights of the approaching car appear to be practically merged into one. Observing this, the "safety" driver perceives that he has plenty of time to pass a car in front of him proceeding in the same direction and pull back on to the right side of the road before the car travelling in the opposite direction passes.

But, if instead of the approaching car being an automobile with two lights showing at a considerable distance away, it is a car with only one lamp might close by at night time, the apparent distance between the two lamps and the rapidity with which this distance diverges as the car approaches.

At a considerable distance away the two lights of the approaching car appear to be practically merged into one. Sir Eric Geddes

The Chairman Of Imperial Airways Dies In England

Sir Eric Geddes, chairman of Imperial Airways and of the Dundee Rubber Company, died at his home in Sussex recently, at the age of 61. He was the first lord of the admiralty during the closing years of the Great War and a brother of Sir Auckland Geddes, former ambassador to the United States.

Geddes, as chairman of Imperial Airways, had been engaged with plans for inaugurating trans-Atlantic service until his recent illness. His death came less than two weeks before the scheduled start of the permanent flights by his company and Pan-American Airways.

A businessman, discovered by Lloyd George for war service, he passed with rapidity through a succession of high positions and was one of the driving forces behind the country's war efforts.

His first war post was deputy director-general of the munitions department. In 1915 he was appointed director of general transportation for the British forces in France and was placed in command of the British director-general of military railways and inspector-general of transportation in all theatres of the war.

He entered parliament in 1917 as Conservative member for Cambridge University. Sir Eric became first lord of the admiralty, retaining that post until 1918. He was later minister of transport.

Chickens Are Excerpted

Motorists In United States Not Held For Striking Them

The privilege of a chicken to delay to the last minute its decision as to whether it will cross a road and eat an automobile is considerably abridged in the State of New York by a bill amending the vehicle and traffic law which Governor Herbert H. Lehman has just signed. It amends the law under which a motorist could be held for striking or killing a chicken or any domestic animal.

The amended law requires a motorist who strikes a horse, a dog or any one of several animals classified as cattle, to report to the nearest animal or the police or to a judicial officer, exhibiting his license and giving his name and address. In such cases an arrest may be made without a warrant. Chickens, however, are excepted—Charlottesville Guardian.

Death Deluding Chemicals

Have Retarded Genuine Research For Past Twenty Years

The research scientist with his eyes fixed on the dollar sign rather than on the alleviation of suffering can find the quickest and easiest road to wealth by seeking employment from governments as an inventor of poisons by gas and other death-dealing agencies, declared Professor Antoine Lacassagne, assistant director of the Italian Institute of Paris. Dr. Lacassagne, who collaborated with Madame Curie, discovered of radium, was in Paris to address the joint conference of the Canadian Medical Association and the Ontario Medical Association held in the Great War may have increased man's knowledge of death-dealing chemicals and apparatus, Professor Lacassagne declared, but it retarded genuine medical research by almost a decade.

Enlarge Panama Canal

Plans Drafted For Work That Will Require Two Years To Complete

Panama canal officials disclosed preliminary plans are being drafted to enlarge the "big ditch" at an estimated cost of \$150,000,000. A bigger canal, they said, will be necessary to take care of an expected increase in traffic.

It was emphasized that work on the plans would probably take ten years. Another 10 years would be required to construct, and the proposed new locks would not be in operation before 1960. Installation of the new locks would cost approximately \$150,000,000.

Kulper: I am convinced that our baby looks like me. Rattigan: I wanted to say the same thing, but I was afraid you would be offended.

Rules Over Island

South African Pays Small Sum Yearly To Cover Lease

"Who would like to be king of a pleasant island set in sub-tropical seas... Lord of all the surges down to the sands which are lapped by the waves of the Indian Ocean?" asks a writer in the Johannesburg Star. "And with the price of this throne only six pounds a year!"

Who would not? There is a South African who has achieved this. His name he wishes to keep, but anyone reading this who guesses it from his initials, A. T. A. is entitled to do so. For A. T. A. has gone out of the world as we know it and has bought one of his own.

It is a delightful island. Situated in the midst of coral-channelled seas, among other islands which are gems of sapphire set above white sands and fringed with blue waters, where the sun is a powerful filter and the moon a soft, tropical veil; in fact, where every prospect pleases exceedingly and even man is not so vile—the world of the Great Barrier Reef of Australia.

He has made an amazing purchase. Merely by paying the Australian Government 46 a year he has been given the lease of an island in Barrier Reef waters. For a little more than 26-a-week he has made himself a king. A. T. A.'s first "Royal" act has shown his appreciation of his bargain. Previously his island was marked on charts as Carlton Island. Now, by a decree royal extra-ordinary, it is known as Paradise Island.

Canadian Medical Association

Dr. Kenneth MacKenzie Is President For Coming Year

The Canadian Medical Association meeting at Ottawa named Dr. Kenneth A. MacKenzie president-elect for 1938-39, and decided tentatively to hold its 1938 annual meeting in Halifax. Dr. MacKenzie's home town, Dr. MacKenzie is president of the executive committee of the Canadian Medical Association and before that was a member of its council.

The 1937 president-elect of the association, who will succeed Dr. Herbert M. Robertson, of Victoria, is Dr. T. H. Leggett, of Ottawa. Other officers elected to serve with Dr. Leggett include following members of the executive council: Dr. G. F. Strong, Vancouver; Dr. D. B. MacPhail, Calgary; Dr. J. E. Bloomer, Moose Jaw.

Some species of birds molt only their feathers at once and are unable to fly during the time. Others replace only a few at a time.

The Chinese consume their tea as we do, generally speaking, but they also use a certain virgin variety of tea leaf as a salad.

On clear days, the cathedral of St. Isaac's in Leningrad can be seen from the Gulf of Finland, 29 miles distant.

An Important Discovery

Glass Drinking Horns Used By Saxons 1,400 Years Ago

Glass drinking horns which were filled with mead to slake the Saxon thirst about 1,400 years ago have been unearthed in a sandpit between the Saxon and Uplminster, Essex, England.

G. T. Carter, a Romford archaeologist, who found the decorated curved horns, also unearthed relics of the stone, bronze and iron ages. Some of them are on exhibition at the British museum, where an official described them as "sensational."

"The horns are the finest ever found in this country," Mr. Carter said. "The discoveries are so important because they show that this tract of marsh and forest in South Essex has been in almost continuous human occupation."

"Elthorpe has been no evidence of Saxon life on the north bank of the Thames, and it was believed that the Britons held the north side of the estuary."

SELECTED RECIPES

NINE-DAY PICKLES

Wash four quarts of cucumbers and cut in generous pieces. Cover with strong brine for three days. Drain. Add a piece of alum the size of walnut after the first hour. Drain cucumbers in a crock. Make a syrup of:

- 3 pts. white wine vinegar
- 2 lbs. brown sugar
- 2 lb. can Crown Brand Corn Syrup
- 1 oz. whole allspice
- 1 oz. whole cinnamon
- 1 oz. celery seed

Pour the boiling syrup over the pickles and let stand for 24 hours. Drain; again bring syrup to boil and pour over pickles. Repeat for three consecutive days in all. Seal in jars or use from the crock. Makes 6 pints.

Attracts Many Tourists

Every Year See Increase In Parties Visiting Russia

More than 100 conducted tours from this continent will visit the Soviet Union this summer, according to Vladimir K. Pavlov, president of Intourist Inc., travel representatives for the U.S.S.R. A majority of the parties will make studies and observe the progress of the Soviet life, while others will go for general travel interest. Mr. Pavlov says the number of organized parties to the U.S.S.R. is increasing yearly.

Round travels 1,100 feet a second; when sent by wireless it takes the speed of electric waves, 186,000 feet a second.

There are 1,100 kinds of animals and insects in the world, with thousands of varieties of each, it is estimated.

Vienna draws its water, famed for its purity, from a distance of nearly 100 miles.

Annual Payment Due

Sixty Thousand Canadian Indians Will Get Treaty Money

Officials of the Indian Affairs Branch of the Department of Mines and Resources, travelling by air, canoe and on foot, will leave shortly for the isolated districts of Northern Canada for the annual distribution of treaty money to the Indians.

Aboriginal settlers who have been selling their rights to the Dominion as frontiers pass northward during the past 60 years, receive an annual gift of \$4 per head, and collection of this money is the big event of the year among the Indians.

Treaty Indians are found in parts of Ontario and in Alberta, Saskatchewan, Manitoba, and the Northwest Territories but there are none in Quebec, the Maritime Provinces or British Columbia. They are those who themselves signed away their aboriginal rights to territory or direct descendants of treaty signers. Children of Indians marrying whites are not eligible.

There are about 112,000 Indians in Canada, and approximately 60,000 receive the \$4 per head treaty money annually. The Indian population is slowly increasing.

Cannot Supply Demand

Telephones Scarce In Japan So People Buy Them

There is a telephone shortage in Japan, the only country in the world where subscribers have to "rent" their telephones instead of buying them.

Every year the ministry of communications offers a certain number of telephones for sale. This year 55,000 were offered to the public and 787,450 applications were received. The post office accepts ordinary applications for a telephone, but there is such a long waiting list that it may not be installed for years. So telephones are bought and sold through brokers at a high premium.

What can be more satisfying, asks a writer, than putting in a hard day's work in the garden? Not putting in a hard day's work in the garden.

Some people find as much pleasure in winning about their misfortunes as other do in boasting of their good luck.

In Japan the silkworm furnishes whole or partial livelihood for at least 18,000,000 people.

Generous Donation

Large Sum Given To Empire As A Tribute To Stanley Baldwin

An anonymous donor has given £250,000 (\$1,225,000) to the empire as a tribute to the way Stanley Baldwin has handled the abominable crisis. It was disclosed in the columns of the House of Commons.

The donor said he wanted to make a "thanks offering" for the former prime minister's "courageous, far-seeing and sympathetic handling of a supremely difficult situation, which involved inevitable dangers for the empire."

The money was placed at the disposal of the premier for the purpose of "endowing any object best calculated to strengthen still further the ties that bind the empire."

The least expensive camera for the amateur photographer is the box, or fixed-focus, type. The most expensive is the reflex type.

The Great Pyramid at Gizeh, Egypt, is the only one of the "Seven Wonders of the Ancient World" still standing.

Early lamp-works were made of dried reeds or moss. In succeeding centuries they were made of glass or silk.

Preserving Ancient Art

Work Of Indians Being Perpetuated At Saskatchewan City

Cameron Worcester, B.A., LL.B., of Saskatoon, is perpetuating in native clay ancient arts of the North American Indians and their contact with trail blazers of the old west.

The potter who is 29, and son of Prof. W. G. Worcester, head of the department of Ceramics, University of Saskatchewan, turned from law to study early art of the Redmen.

Young Worcester learned that Saskatchewan clays, which have not been used to any great extent, offer an ideal medium for the potter's art, and many fields are yet to be explored.

He has modelled heads of Sioux chiefs and Cree in headbands and warpaint, but most of his work is given to nature studies. He has found Indians preferred to draw animals and birds.

Scenery Can Be Enjoyed

View In Australia Is Not Blocked By Billboards

When Australians go motoring they can take in whatever scenery is blankly without having their view blocked by billboards. In the state of Victoria alone, not a billboard was to be seen on 10,000 miles of highway. W. T. B. McCormack, chairman of the state's country roads board, said he has just completed a month's study of western Canadian and United States road systems.

Air Hero Feelless

Capt. Rival Boyd, First Canadian to Fly the Atlantic, Has Fallen on Evil Days

The man who was commended as a general in the army at Hatt and has spent 7,500 hours in the air, has received an eviction order in his home town, Toronto. His furniture has been seized and he faces the prospect of being homeless, penniless with his wife and four daughters.

THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER VII.—Continued

"You are very backward, Paddy," he told me, "in your book learning. You are too talkative by far, and you are an annoyance to me in the school. I shall set you your tasks at home. You'd gain very little at the school, anyway. As well might I try coaxing the stars out of the sky into my hand, Paddy, as try pounding sense into those dumb-heads."

The first care of a boy like me, he told me, should be to think and speak his thoughts clearly in the simple words of the English tongue. And to do that, the boy must be able to speak his words mean and be the master of many of them.

"I will have no gabble-gabs about Whistling Hill," declared Old Hickory Mick. "Tighten up the belt of your tongue."

The master put me under a rigid discipline; and had great patience with me because he knew I was trying desperately to do better. The new fresh words a day to taste them by rolling them on my tongue, he pronounced them aright, to know their precise shades of meaning, and to use them freely and naturally in conversation that was my daily task. The whole matter is clear to me now. The human brain cannot reason without words. A man cannot picture even on his own thoughts save with the use of words. In a year's time, I could quote almost every statement made by Christ on earth. I was learning English grammar, not by committing stupid rules to memory, but by hearing the language correctly spoken. I could, in time, labor through the stilted, crabbed editorials in the semi-weekly Globe newspaper; though I preferred greatly the new story of Donkey and Son, which was printed as a serial when not crowded out by other stupid matters. While I was with Michael Hughes, I was carried on some way also into other things; for a poor orphan boy, I have never felt that my education was sadly neglected.

He does not get learning in a school for its own sweet sake. Michael told me one day, years afterward, that we were fishing in the creek for trout.

"All one gets there," he continued, "is merely the tools that enable the brain to work. Now I would have you observe," he told me, after a sharp look at his line, "that fishing for these little trout is a real education for any person, young or old. The fisherman, as you observe, gets a splendid training in patience and perseverance. At the same time, the mind is getting a rest and is recreating itself. (Take hold, you little devil!) And such an education is practical because its rewards become gross and palpable in the frying pan. (Quit wriggling, my little beauty!)"

"It is possible, Paddy," he told me, "for the human brain to be so crowded with facts and the trifling scraps of knowledge that no space has been left there for sense thinking to be done. Some very learned men

What quarrels did we both have had this year of sorrowable? But oh, my bonning heart is glad To see you crown the table.

Dear fondling of the night's nest, My father kind, my mother blest, My supper good, my linen wet, 'Till hold you while I'm able!

Mr. Murphy, the tavern keeper, came in and spoke to me.

"Faith happy I'd be little lad, if you could get Old Hickory out of the place and keep him away from the tavern forever. But I know the man. He'll not budge out the door this night, unless he is thrown out. Run away home! The drink is already starting to gaw at their innards, and they will soon be rough and quarrelsome."

One of the Irish kings from Ad-his Township was busy singing Calleen Rue. Michael was insisting that the man shut up.

"I've some of his friends come for him in the morning," Mr. Murphy asked me, as I set off for home. "It's a sick man they're finding!" Mr. Marshall sent the beleaguered over next morning to bring Michael back to Whistling Hill. The groans of him were filling the whole tavern. Hunched down 's a chair, the man came as weak as a wet rag. His face was chalky and his hands were clammy moisture. Mrs. Murphy was darning hot green tea into his rebellious stomach.

"Oh, God, what a mess!" Woman, I am a sick man! Oh, God, I am a sick woman!" he wailed, holding his pain-wracked head, and George without throwing up the rubbish.

"Vot cry out, you scoundrel!" abashed him. "Sure, a howling cat always finds its mother first! Hear him cry!"

Poor Michael got a swallow of tea down him.

"And you will be up to your tricks again, too, Michael Hughes," she scolded him. "Don't desert, be coming back here disgracing a respect!"

We handed Michael up and drove him home. Mrs. Murphy slipped me a small flask as we were leaving.

"Don't let him smell it or it willicken him, Michael," she said.

"But put a few drops into the tin on the side, to-day; it will help to numb the sting of the fever."

It was a miserable time the man had while his body was purging itself of the poison; and Michael always, when he recalled it, said the hunched form, and a chastened spirit. He consoled himself for a week afterward by reading the paper, and the Virginia Star, and weaned me with the sound of them.

In the course of my duties at the Whistling Hill, I came to know a lot about this business of whiskey drinking. I am not, of course, referring to the medical side, but the drinking of hard liquor, which becomes a regular habit with many men, some of whom live to a great age, and some of whom are respected and successful members of their communities. A true history of the whiskey business in this country is a long and sad story, but one that every high official under the crown has been occupied, one time or another, by a gentleman who made a specialty of this business, and turned up twenty ounces of Scotch whiskey a day—generals in charge of armies in the field, judges in the appellate courts, prime ministers.

It is necessary to name them? My concern was not with the man who took alcohol in such regular doses that his body tolerated it as a food.

Michael Hughes was not a tippler. He never kept a drop of liquor about the house; and at ordinary times the very smell of it was unpleasant to his nostrils. The condition of his nerves seemed to create at intervals a craving which he fought off days, but which usually overcame him. Like a journeyman barber of to-day, he usually held out till a Friday. And when he drank, he poured hard liquor down his throat, and the nerves of a cross and empty stomach. A rebellion promptly broke out in the quavery and irritable nerves of a cross and empty stomach. A rebellion promptly broke out in the quavery and irritable nerves of a cross and empty stomach.

There is a tavern in our town, and there my sweetheart sits down, sits down, sits down.

Michael Hughes, meanwhile, was delivering a learned discourse to the ceiling beams on the flight of a dung slug. One of the audience was making noises like a corkcane. They were all at the stage when gentlemen lose track of the passing of time.

I gave Michael a pluck on his coat and asked him to come away home. "By the hole of my coat," the man exclaimed, "here has come my conscience walking up and down, and to and fro, upon the earth. Get thee behind me, Satan!"

And then, lo and behold, the school teacher drifted into that every stage of every kindness into which drink stews gentlemen at times. They become so soft and tender that their affections embrace the whole world; they hearts go out to their enemies; they think every woman delightfully pretty and they shed tears over the hurt feelings of a little dog. They mean and grow because nobody loves them.

Michael insisted on singing a song:

Whiskey's soul of revelry, Low in the mud you sent me Possessed with all your devilry, I challenge foes to beat me.

Behold my coat to shreds is done, My neck cloth down the wind has run, But I'll forgive the deeds you've done, If you to-morrow meet me!

fine young lady teacher in the same school section killed herself, years afterward, by eating sour pickles and chewing chalk.

(To Be Continued)

Want International Park

Proposal to Make In Respect To Part Of R.C. And The Yukon

President Roosevelt was represented as "very receptive" to a plan to make part of British Columbia and the Yukon into an international park and Skagway, Alaska, a free port. Under the project envisioned by Senator Lewis H. Schwellbuck of Washington and Delegate Anthony Dimond, of Alaska, the section of Canada dipping southwestward toward Skagway, Alaska, from Chilkoot Pass to the Chisana-Whitely River Pass on the eastern border of Alaska would be made into an "international park."

For months the two have been considering the scheme to obtain from Canada sufficient land to provide an "inside route" for United States flyers between Skagway and the main body of Alaska. At present aviators must fly over Canadian land, which involves international law, or skirt the rugged, glacier-bound coast, a hazardous undertaking in winter.

They explained by making the block of country an international playground citizens of the United States could have free access to the park, or could fly over it without customs restrictions. In exchange for Canada's concession of land, the United States would under proposal, make Skagway a free port, thus giving Canadians in adjacent Yukon free access to the sea without annoyance of present United States regulations.

Discounts Old Legends

Well-Known Story About Lady Godiva Does Not Escape

Coventry today not only honors its most famous woman, Lady Godiva, but also "Peeping Tom," who is supposed to have been struck blind for peeping on her during a ride through the city's streets.

Lady Godiva herself has two statues in Coventry, one in the Guild hall, the other in the Great Hall. Hundreds of tourists to England visit Coventry each summer. "Peeping Tom" is also immortalized in Coventry, presumably as a bad example, with several effigies. These are each in a different part of the city, but all purport to mark the exact spot where he was struck blind.

Both Lady Godiva and "Peeping Tom" have come in for their share of debunking in recent years. It now turns out that the legend of "Peeping Tom" did not appear in the first story of the ride, but was added years later as an afterthought.

As for Lady Godiva, a Benedictine abbey founded by her in 1043 once gave proof of her existence. That was in the reign of King Edward the Confessor, and while most people still admit that she was a real person, they think she never existed. No documentary evidence of her turned up until 150 years after her death and such risks detractors say. In the old folk tales, Lady Godiva's name, the debunkers say, was attached to such a legend to do honor to her pety and good nose.

Have Not Had Success

Party From Germany Travel Far In Search For Work

Two men and a woman sailed into Capetown, South Africa, in their five-ton yawl, after an adventurous voyage from Germany, their food and water supply almost exhausted. They are Frederick Bruggas and his wife, and Heinrich Matthes. Originally there were four, but one died of cholera on the west coast. Their ship, the Stella Maria had traveled 12,000 miles. The party set out with the idea of finding work in foreign countries, but so far have been unsuccessful, although they have been away from their country since August 1, 1931. They stayed at Angola six months hunting big game.

Not Interested In Stunt

A Kentucky woman who wants "to go over the falls in a rubber ball" on the Canadian side some time during the warm weather, has written to the mayor's office in Hamilton, Ont., asking: "Can I go over the falls in a rubber ball?" English as I don't know French. A secretary complied, tossing cold water on the proposed stunt.

When it's moving the standard Pullman car generates enough electricity for its own use to illuminate four ordinary homes.

The total number of dogs in Britain is about 3,000,000.

Make Use Of Waste Gas

Can Convert Turner Valley Oil Into Fuel For Automobiles

Application of modern chemical knowledge can convert waste natural gases of Alberta's Turner Valley oil field into fuel for automobiles and other industrial products with consequent increased production value.

Dr. A. Cameron, of the national research council of Ottawa, said, Dr. Cameron, addressing the Canadian Chemical Association's annual convention at Vancouver, and increasing demand for some of the products which can be derived from natural gas and improvements in production processes, will "probably make such a development profitable in the near future."

Only location of the field and restricted coal markets has made chemical processing of the gas at Turner Valley unprofitable to date, he said.

Oak Trees Planted

The king and representatives of the empire planted 60 oak trees in Windsor Great Park as a commemoration of the coronation. The king planted the first tree. Hon. Vincent Massey, high commissioner, acted for Canada, and Dr. Davies for Newfoundland.

It is better to try to do something and fail than to do nothing and succeed.

Moons Turn Slowly

The long nights and days on the moon result from the fact that, as the moon travels around the earth, it turns very slowly on its axis. Thus, one side of it is exposed to the rays of the sun for a great length of time.

Bicycles are virtually a household necessity for young and old in Bermuda, where automobiles are banned.

Cut Down Food Waste

—by covering all perishable goods with Para-Sanitary Waxed Paper. Para-Sanitary moisture-proof texture will keep them fresh until you are ready to use them. ROAD IMPROVEMENT PROGRAM

Road improvements which will cost around \$1,000,000 are on this year's program, according to information given recently by Hon. W.A. Fallow Minister of Public Works.

The program includes 150 miles of "blotter" surfacing of main highways, part of which will be financed by a \$750,000 grant by the federal government.

Graveling, new roads and reconstruction all combine to make up a comprehensive program for the current year. On some projects, work is now under way.

The program includes "blotter" surfacing of the 70 miles of highway from Waterton Lakes park by way of Pincher Creek to Macleod. The 22-mile stretch from Calgary to Okotoks is practically completed with this type of surfacing.

The 30-mile road from Calgary to Crossfield, on the main Edmonton-Calgary highway, also is on the "blotter" program. From Edmonton to Wetaskiwin, which is reconstructed highway in part, this surfacing also will be provided. The distance is 25 miles.

Between Okotoks and Macleod, the department will push ahead with a reconstruction program, and as much as possible will be completed this year. Graveling will follow the grading.

The program also includes the laying of a "seal coating" between Calgary and Banff, this being a final stage on that work which should then have a degree of permanency for several years, in spite of the heavy traffic.

WHAT I LOVE MY TOWN

The following is copied from an exchange:
"If all my citizenship account, were balanced at this date, I would be the debtor. Haven't I, all these years, lived within the limits of the town and shared all its benefits? Haven't I had the benefits of its schools and churches? Haven't I had the use of its parks and public places? Haven't

Snicklefritz----

Teacher: "If you subtract fourteen from a hundred and sixteen, what's the difference?"
Tommy: "Yeh, I think it's a lot of foolishness, too."

"Why do you want your name changed to Charles Peter Rummy?"
"It's my wife's idea, she thinks we ought to have the initials that are on our knives."

"Rastus, I'm sorry to hear that you have buried your wife."
"Yasuh, boss, ah just had to; she was dead."

Customer: "Ginger Ale."
Waiter: "Pale?"
Customer: "Good gracious, no, just a glass."

Repair man: "I shall I instal a loud or soft horn, sir?"
Motorist: "No, just one with a dirty sneer."

Girl: "I maintain that lovenaking is just the same as it always was."
Her Sweetheart: "How do you know?"
Girl: "I just read about a Greek maiden who sat and listened to a lyre all the evening."

I had the protection of its fire, police and health department? Haven't its people during all this time, been gathering for me, from the four corners of the earth, food for my table, clothing for my body, and material for my home?

Haven't my town furnished the patronage by which I have succeeded in my business? Haven't it furnished the best friends of my life, whose ideas have been my inspiration, and whose kind words have been my cheer; whose helpfulness has carried me over the greatest difficulties?"

This is a viewpoint which is not too common, but has no little substance. The privileges of citizenship in a pleasant town are met in a measure, but not altogether, by taxes. There is a tonic which we cannot measure in money, in our neighbor's flower gardens, in tree shaded walks, in well kept homes and in all the graces of nature and man's industry, which flourish round us. There is a satisfaction in kindly companionship and in neighborliness on which no taxes are paid. Such by-products of town life are invaluable, yet they make up the values and happiness of life.

Rocky Mountain Holidays

The busiest tourist season in years is at store for the Canadian Rockies. Banff Springs Hotel and Chateau Lake Louise, recently under ideal conditions make the Canadian Rockies' Canada's leading summer playground. Add to this scenery unexcelled in the world, excellent fishing, and endless opportunities for camera hunting of big game and the result is Banff, Lake Louise, or any of half a dozen Canadian Pacific bungalow camps set in valleys or by lakes of outstanding beauty.

Banff, riding and hiking over spectacular mountain trails, tennis on splendid courts, boating on glacial lakes, and other sports under ideal conditions make the Canadian Rockies' Canada's leading summer playground. Add to this scenery unexcelled in the world, excellent fishing, and endless opportunities for camera hunting of big game and the result is Banff, Lake Louise, or any of half a dozen Canadian Pacific bungalow camps set in valleys or by lakes of outstanding beauty.

Each year in the Rockies several feature events are held in addition to the day-by-day amusements. Among them are the Calgary Stampede, July 5 to 10; Indian Days at Banff, July 23 to 25; outing of the Trail Riders of the Canadian Rockies to Mount Assiniboine, July 30 to August 2; outing of Trail Hikers of Canadian Rockies in Moraine Lake district, August 6 to 9; Banff golf week, August 23 to 28; and Yoho Valley reunion camp of the Alpine Club of Canada from July 17 to 31.
